As a customer of The City of Lock Haven Water Department,  
you were notified on Wednesday, April 6, 2016 of a problem with our drinking water and were advised to boil your water before using because of a loss of positive pressure caused by a main break.

We are pleased to report that the problem has been corrected and that it is no longer necessary to boil your water before using. The water main has been repaired and positive pressure restored. The water has been tested twice over a two day period and is free of contamination.

We apologize for any inconvenience and thank you for your patience.
